Issued : November 18th, 2025

SUBJECT : **Status update – project overview: description, target, milestone plan, budget requirements**
Project group #5 - Functionality

2nd Status update - Project overview:
description, target, milestone plan, budget requirements
Project group #5 - Functionality

Participants & Roles:

The project group consists of seven companies.

In August all participants confirmed to contribute active in the project group

Project Progress:

To date, six project meetings have been held. Three of them after the objective was to define to focus on Plant protection with the improvement of shelf life in fruits/vegetables by edible coatings using lecithin/phospholipids

Road map:

Extensive literature research for the above defined topic, including which companies may be interested in this project of edible coatings using lecithin by end of September of all participants.

The search results are shared in an excel overview and the existing ones have been uploaded in the share point.

Project members started to evaluate first studies and summarized the findings for the project group.

Target is to develop a kind of questionnaire/FAQ for identified partners, institutes, organisations dealing already with edible coating to develop a better understanding about the different function of lecithin (emulsifier, carrier, active ingredient) in mixtures used in edible coatings and to define a project for practical tests.
